**Educating Empathy - Caring for Dementia**

*Center for Didactics of Art and Interdisciplinary Education*

This online symposium aims to showcase artistic research and teaching strategies based on principles of art and design education that strengthen empathy for people with dementia. **Educating Empathy – Caring for Dementia** addresses anybody interested in the topic, relatives of people with dementia, care takers and especially younger people. International and national experts in the areas of artistic research, dementia care, art, design, therapy, art education, music education, and fine arts as well as applied arts are invited to participate in talks, lectures, screenings and presentations.

National and international experts share their views and experiences; artists showcase their work:

English in the morning | German in the afternoon
